Content themes

	GLOBAL TREND	CAPITAL MARKETS	VIETNAM POLICY, 2030 TARGETS AND SMART CITIES
◆ Government and Ecosystem	**Innovation Geography** The map of innovation is being redrawn, and HCMC is claiming its place.	**Deep Tech Capital** Capital follows clarity, and HCMC is writing the rules investors want.	**Policy to Proof** HCMC's new policies now have to show results the world can see by 2030.
◆ Frontier technologies - AI	**Compute Power** Every AI ambition now runs on chips, power and connectivity.	**AI Advantage** Organisations that turn AI into measurable results are pulling away, and finance is the proving ground.	**Applied AI Vietnam** AI earns its place when it runs traffic, utilities and harvests, under clear rules.
◆ Frontier technologies - Quantum	**Quantum in Action** Quantum technologies are moving from research labs towards real-world applications.	**Quantum Capital** Connects quantum development with investment and national strategies.	**Quantum-Safe Security** Makes quantum security and PQC migration relevant to Vietnam's policy agenda.
◆ Frontier technologies - Blockchain	**On-Chain Rails** Shared ledgers are becoming core infrastructure for settlement and trade data.	**Programmable Assets** Blockchain is turning deposits, bonds and funds into programmable digital assets.	**Trusted Digital Markets** Vietnam is building a regulated digital asset market and traceable exports from day one.
